

**servizi
LOGISTICI**

History

Servizi Logistici was established in late 2014 through the lease and subsequent purchase of Log Service Europe, a long-standing logistics company founded in 1996. Servizi Logistici has become a national logistics leader.

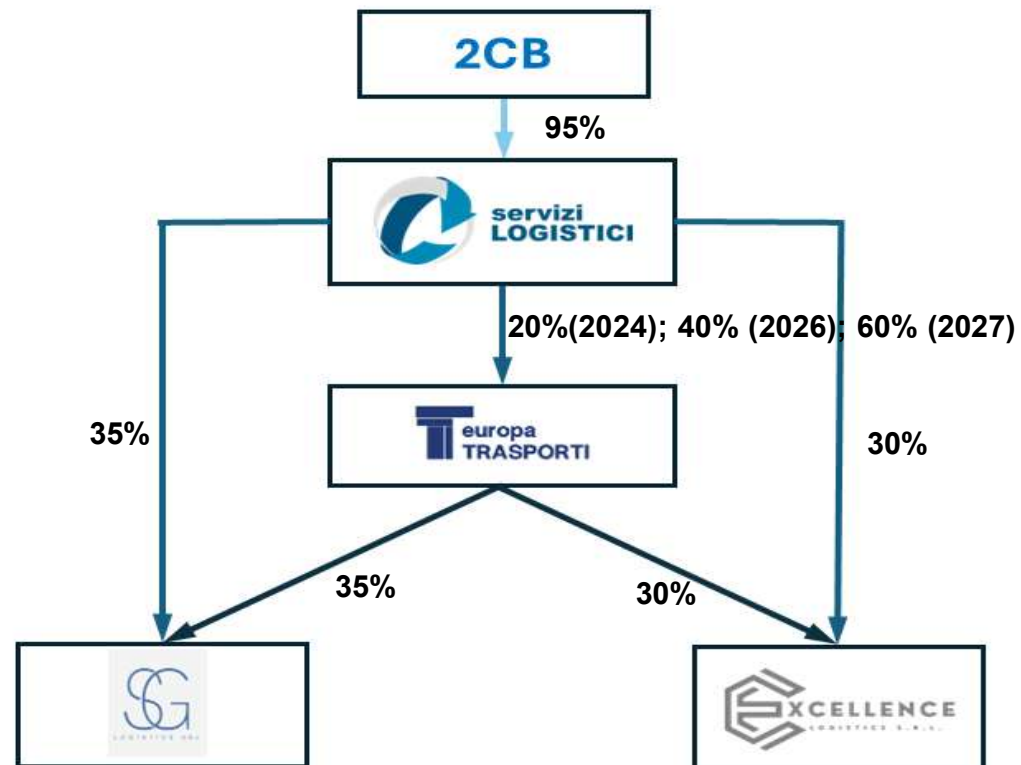

Servizi Logistici has acquired and acquires know-how in warehouse management and distribution with a strong specialisation in household appliances, consumer goods and food.

Today, the company is able to provide all integration and customer interface services for both traditional and e-commerce activities.

The company is ISO 9001, ISO 14001, ISO 45001, certified and has dedicated areas for handling dehydrated food products, BIOS certified and HACCP approved.

Group profile - the structure

Group Profile: T.T. Europa Trasporti

In 2023, Servizi Logistici began the acquisition of T.T. Europa.

The operation is strategic because it aims at:

- **increasing** consolidated turnover in the predetermined growth path;
- **integrating** the activities of the two companies, **expanding** the supplier base and, consequently, the efficiency of the system;
- **increasing** supply in the distribution and transport sector.

About T.T. Europa:

WHAT. T.T. Europa's annual turnover is made up of 70% transport and distribution activities while the remaining 30% handling and warehouse management activities.

WHERE. The main activities are carried out in 45,000 square metres of warehouses located in Belgioioso (PV), the company's main HUB and headquarters.

Group Profile: SG Logistics and Excellence Logistics

Since June 2024, Servizi Logistici and T.T. Europa have further consolidated their partnership through their participation in SG Logistics and Excellence Logistics.

The new companies handle handling and cargo handling activities within the Group.

The advantages of internalising warehouse staff:

1. on the **fiscal and administrative** front, transparency;
2. on the **union** front, direct management through a single structure operating for the Group;
3. on the **operational** side, SG Logistics and Excellence Logistics, through their operational partner and specialised recruitment and resource management structures, enable them to address both short-term and medium/long-term flexibility issues.

Our Services

For **Servizi Logistici**, the safety and protection of its customers are primary objectives. Such objectives go through the improvement of supply chain processes in order to maximise efficiency, organisation and timeliness.

Security Systems

external control system:

- *24-hour guard service 365 days a year in cooperation with C.i.v.i.s (Centro Italiano di Vigilanza Interna e Stradale);*
- *complete perimeter of thermal imaging cameras around the sheds;*
- *protection of critical points with the addition of external detectors equipped with artificial intelligence;*
- *24/7 video surveillance system around the perimeter of the building with bullet cameras;*

internal control system:

- *magnetic contacts on all doors;*
- *motion detectors installed in traps and near critical areas.*

Benefits

- improved operating speed to ensure more efficient marketing;
 - ability to handle peaks thanks to the flexible labour force;
- increased efficiency through customised logistics solutions;
- ongoing process improvement, driven by research and development activities;
 - just-in-time delivery.

IT Solution

WMS

For the management of warehouse activities, **Servizi Logistici** provides the use of its own Warehouse Management System (WMS) suitably interfaced with customers' ERPs.

SL relies on a leading logistics IT company to develop and update the programme.

Main WMS functionality:

- serial number and batch management;
- different picking possibilities (by order or bulk);
- packing list management per individual parcel on a parcel label;
- picking/stock and replenishment management;
- FIFO/FEFO management;
- integration with TMS and major carriers;
- batch management.

IT Solution

TMS

For the management of transport activities, **Servizi Logistici** provides the use of its own Transportation Management System (TMS).

SL relies on a leading logistics IT company to develop and update the programme.

1 TMS features

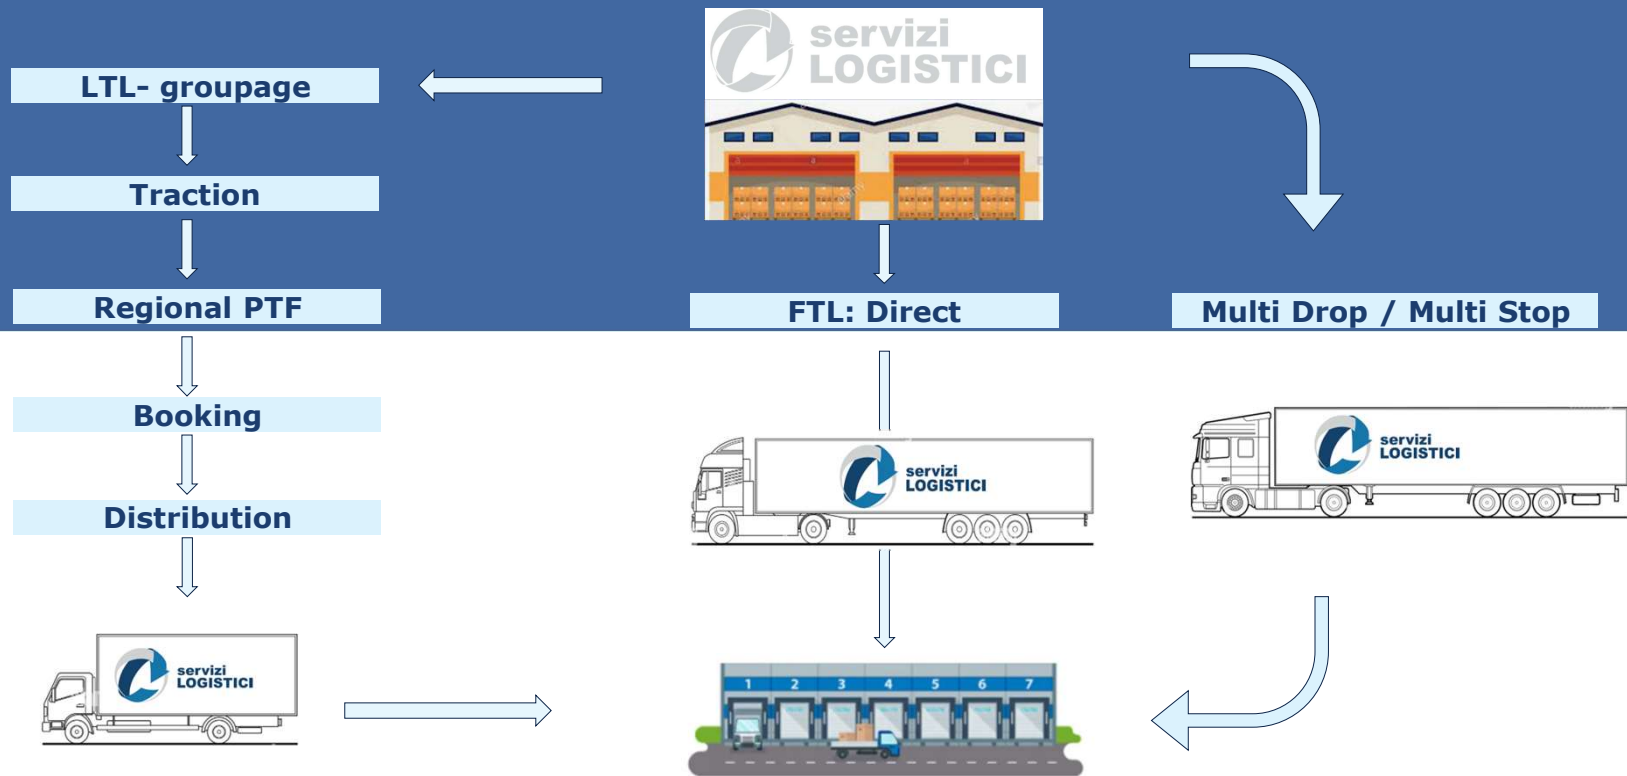

- travel planning;
- tracking means, events, supports and outcomes;
- management of costs, revenues, margins and invoice control;
- departure preparation monitor;
- smart business.

2 Tracking

- access portal per customer or consignment;
- visibility of the shipment's progress;
- I.O.D.;
- P.O.D within the timeframe required by the customer.

Distribution flow

Main customers

«Quality is satisfying the customer's needs and exceeding its own expectations while continuing to improve»

[William Edwards Deming]

Customer types

- food coils;
- small/large household appliances, televisions;
- toys, nursery and baby accessories;
- office supplies, archives, furniture, stationery, etc;
- school, marketing/promotional products;
- solar panels;
- air conditioning;
- dry foodstuffs;
- sportswear;
- household products.

Quality and safety

✓ ISO 9001 QUALITY MANAGEMENT SYSTEM

✓ ISO 14001 ENVIRONMENTAL MANAGEMENT SYSTEM

✓ ISO 45001 OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT SYSTEM

Quality and safety

✓ ATTENTION TO THE ENVIRONMENT

2.15MW of solar panels installed on the roofs of warehouses in Bressana Bottarone for a total of about 30,000 m2 covered by photovoltaic panels.

✓ HACCP/BIOS/AIB COMPLIANCE

The Group's warehouses comply with HACCP standards for hygiene and health safety in food handling.

Bressana's warehouses also comply with AIB International's standards for Food Distribution Centres.

Carbon footprint

Carbon footprint is a measure of the amount of greenhouse gas emissions that are released into the environment, expressed in tonnes of CO₂ equivalent. It can be associated with the manufacture of a product, the provision of a service, or even an activity performed daily by each of us.

Scope 1:

Direct emissions

(heating, company cars, refrigerant gas, other)

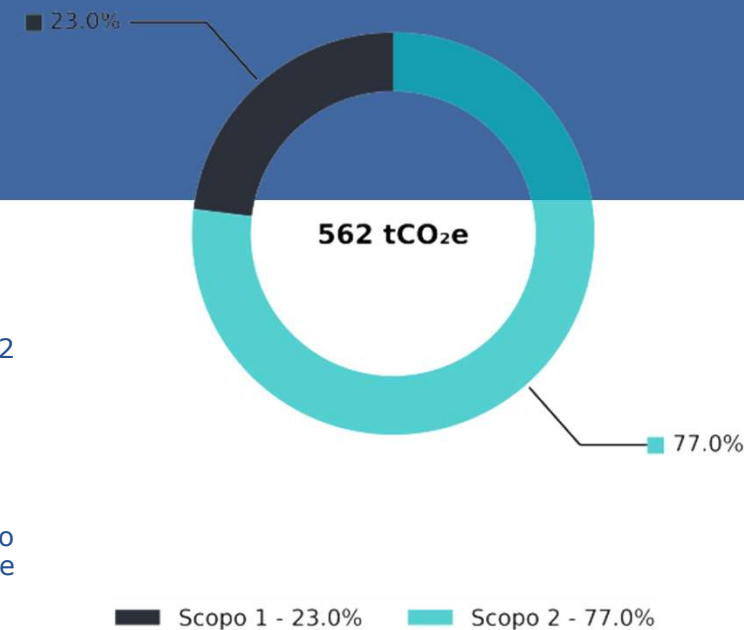

Servizi Logistici in **2024** joined the 'BambooPro' programme by purchasing 150 tCO₂ equivalents, almost entirely offsetting the Scope 1.

Scope 2:

Indirect emissions from energy consumption

(electricity or heat generated by third parties)

In **2025**, Servizi Logistici, in addition to purchasing the same amount of tCO₂-equivalent, also aims to reduce Scope 2 through the use of renewable energy sources so as to be able to reduce its emissions to zero (carbon neutral).
